I. GENERAL INFORMATION

Historic Name:

A part of this district is located in the 19th century settlement of Lemon City, an important shipping port before Miami's incorporation (1896). While Lemon City had no "official" boundaries, author Thelma Peters' places its point of beginning at and near the present NE 61st Street. While there is evidence of sporadic settlement dating back to the mid-19th century, the first mention of Lemon City in the public record occurs in December, 1889.² Today, there is virtually nothing left standing from the community, with the exception of the Dupuis Medical Office and Drugstore, located at 6041-45 NE 2nd Avenue, built in 1902.

Current Name:

Palm Grove Neighborhood

General Boundaries:

The area is generally bounded on the north by the Little River; on the south by NE 58th Street; on the east by the rear property lines of the buildings fronting Biscayne Boulevard; and on the west by the FEC Railway.

<u>Description</u>

The boundaries of this district include approximately forty blocks within Miami's Upper East Side. The Biscayne Boulevard/ MiMo Historic District is immediately east of the proposed historic district.

The following describes the breakdown of those properties which are found to contribute to the character of the historic district, and those that are found not to contribute either because:

- a. Through alterations/ additions the original character of the property is no longer discernible
- b. The resource falls outside of the period of significance.

Number of Contributing Resources: 342
Number of Non-Contributing Resources: 224
(Total improved properties) 566
Vacant Lots 47
Parking Lots 6

II. SIGNIFICANCE / HISTORY

Summary Statement of Significance

The Palm Grove Neighborhood is worthy of local historic district designation primarily for its portrayal of the growth and development of Miami from the 1920s to the late 1950s, as it embodies dwellings that display popular styles of the period. Characterized by single-family and multifamily dwellings as well as warehouses, the original residents were generally from the middle classes, and their homes were modest in terms of size and design. The neighborhood was initially platted in the 1920s, but many of the lots remained undeveloped as the Florida Land Boom came to an abrupt end in 1926. By the mid-1930's another wave of construction began lasting well into the 1940s as returning servicemen and women took advantage of government-insured loans. By the mid-1950s the majority of lots within the neighborhood had been developed, illustrating the rapid growth and expansion occurring in the city into this period. As a result, the Palm Grove Neighborhood contains a significant collection of residential architecture from the early to mid-20th century. The district includes a collection of one-story Mediterranean Revival homes; apartments that express Art Deco detailing; and a wider variety of the form known as "Minimal Traditional" and Ranch, which characteristically employed decorative detail gleaned from other stylistic vocabularies which include: Craftsman, Art Deco, and Art Moderne.

A Brief History

Miami, incorporated in 1896, was at that time, a settlement encompassing approximately two square miles. By 1913 the city had expanded to sixteen square miles, and by the end of the unprecedented real estate boom of the 1920, the city had grown to some forty-three square miles.³ individuals or companies involved, and platted landscapes of the subdivisions included in the Palm Grove Historic District are typical of the development that occurred during this last period of rapid expansion from 1921 to 1926.

Some portions of the area included within the Palm Grove Neighborhood are located in one of the area's earliest settlements --- Lemon City. homesteading families likely began living in the area where modern NE 61st Street reaches Biscayne Bay in the 1870s. By the time they obtained legal title to the area in 1890, they had already begun to sell parcels of it. Newcomer to the area E. H. Harrington purchased 11 acres for a subdivision dubbed Lemon City. The name stuck, and began to be used for both the subdivision and the backcountry surrounding it.4

³ Aristides J. Millas, "Miami," in *Miami's Historic Neighborhoods: A History of Community,* ed. Becky Roper Matkov (San Antonio: Historical Publications Network, 2001), 20.

⁴ Thelma Peters, "History," on file at City of Miami Planning Department, a1.

Lemon City provided the only deep water access at the time and developed quickly as a major shipping port along the Florida coast. As the local population grew and people constructed other subdivisions, they began to build roads and businesses. By 1895 Lemon City had grown to include a sawmill, blacksmith shop, two hotels, a few saloons, a restaurant, stores, a real estate office, and some eighty houses.

Around the turn of the century, Lemon City began expanding westward. The railroad came through in 1896, and a 1902 rock road along modern NE 2nd Avenue connected Lemon City to Miami and its newly developed railroad and steamboat shipping operations. While a vibrant community at its beginnings, ultimately with the option of the deep water port of Miami, Lemon City became less an economic focal point. Lemon City along with the 19th century settlement of Cocoanut Grove was incorporated by the City of Miami in 1926. Little remains from the Lemon City settlement today.

Miami's second period of development, from 1913 to 1920, was defined by continued growth. The Dixie Highway, the first continuous paved route from the Midwest to the Southeast, terminated in Miami in 1915.⁵ The accessibility of Henry Ford's Model "T", the growth of the railway system, and the continuing improvement of the roads set the stage for the waves of Americans who came to Florida in the 1920s, seeking to buy their own small piece of paradise.

By 1920, had women received the right to vote, prohibition became law and more than 23 million cars took to the newly built highways. The "Roaring Twenties" had arrived, and Florida was at its epicenter.⁶ The volume of real estate transactions was nothing short of phenomenal, as streets were crowded with real estate entrepreneurs and ships and trains moved non-stop into the ports and stations with building materials. At one point the FEC Railway closed the train tracks to nothing but perishables, as the weight of the lumber had done serious damage to the tracks. New cities were created almost overnight, among them the Glenn Curtiss' developments of Opa Locka, Hialeah and Miami Springs and George Merrick's Coral Gables. Commercial high-rise development was in high gear north of the Miami River in the commercial downtown, while estate homes on Brickell Avenue (then nicknamed Millionaire's Row) rose south of the river.

Significantly, the plats that are included within the Palm Grove Neighborhood were filed during this period. They are: Bay Shore, 1922; North Gate, 1922; Morningside, 1924; Baywood, 1921 and Federal Way, 1926.

The Development of the Palm Grove Subdivisions

With a freight embargo, the default of loans, a devastating hurricane, and continuing criticisms from the press, Florida's seemingly unstoppable boom, came abruptly to an end. By 1926 the future was indeed gloomy, and some of those early cities which had borrowed heavily by issuing bonds, encumbering themselves with great debt, found themselves bankrupted when they could not pay even the interest due of the bond issue. In 1929, as the nation entered the depression, Florida had already endured a painful downturn, but experienced a better economy sooner than the rest. Tourism proved a major industry, and helped the region rebound economically and avoid many affects of the Great Depression.⁷

The Palm Grove neighborhood owes its existence to five residential developments platted during the early 1920s. Furthest south in the proposed district is Bay Shore. The Bay Shore Investment Company received city and county approval in 1922 to construct Bay Shore; its unit's one and four were platted in the six blocks between modern NE 54thStreet, Biscayne Boulevard, NE 60th Street and the railroad tracks. The Delaware-based company's Mid-Atlantic roots reflected in their choice of street names such as Piedmont, Albemarle, and Potomac, but they also included names that reflected the area such as Biscayne and Hibiscus.⁸

Above Bay Shore was the subdivision of North Gate. North Gate's plats show plans for 176 lots located along and between modern NE 60th Street (then called Virginia Street), Biscayne Boulevard, (East Dixie Highway), NE 65th Street (Kanawha Street), and NE 4th Court (Harriman Avenue). The city and county approved the North Gate development plans offered by C. J. Pearson, President of the West Virginia-based C. J. Pearson Company, in 1922.9

Morningside was north of North Gate. Its founders, a married couple named L. E. and Carrie E. Edwards, received city and county approval for the development in 1924. The notary public examined Carrie E. Edwards independently to insure that she acted "without any constraint, compulsion, apprehension or fear of or from her said husband." Morningside's plat included 200 lots along and between NE 66th Street, modern Biscayne Boulevard (East Dixie Highway), the southern side of NE 69th Street, and NE 4th Court.¹⁰

⁸ Clerk, Plat 5, Clerk, Plat 15, and Clerk, Plat 16.

⁹ Clerk, Plat 8 and Clerk, Plat 9.

¹⁰ Clerk, Plat 12.

Above Morningside was Baywood, the earliest of the five developments to receive city and county approval. In 1921, Miami and Dade County authorized The Krames and Carlett Company and L. E. and Carrie E. Edwards to begin their plans for 94 lots north of NE 69th Street (then called Minerva Drive), Biscayne Boulevard (East Dixie Highway), NE 71st Street (Baywood Drive), and NE 4th Court (3rd Street). Along the southern edge of modern NE 71st Street, the Baywood development continued to the edge of Biscayne Bay. 11

Federal Way was the furthest north of the five subdivisions. Bounded by NE 71st Street, Biscayne Boulevard (6th Avenue), NE 79th Street, and the railroad tracks, it constituted the largest development within the proposed Palm Grove Historic District. O. W. and W. C. Ewing, from Dade County and another husband and wife team, received approval for their development in 1926. Federal Way was, thus, also the last of the developments included in the proposed district.¹²

The development of Bay Shore, the southernmost of the historic developments included in the proposed Palm Grove Historic District, is a case study for Miami boom development patterns. James H. Nunnelly, who owned a candy company, turned real estate developer early in the decade. He founded the Bay Shore Investment Company in Delaware; it was one of several out-of-state companies eager to take advantage of the frenzied development in south Florida. The company's subdivision in its entirety crossed modern Biscayne Boulevard to plat the area between modern NE 54th Street, Biscayne Bay, NE 60th Street, and the railroad tracks. In 1922, Nunnelly launched the Bay Shore subdivision. 13

The investment company billed Bay Shore as south Florida's "most superior development." Amenities included paved roads, sidewalks, swales, medians, underground telephone and electric wiring, storm sewers, gas lines, streetlights, fresh water supplied by a well and pumping station, and underground conduits. The company planted 4000 trees and landscaped the parkways with bougainvillea, palms, coleus, and St. Augustine grass. A master architect stipulated setbacks and lot frontages.¹⁴

Prominent architects with important local credits designed some of the early Bay Shore houses. Robert Law Weed, who designed part of the 1929 Sears building north of downtown Miami; L. Murray Dixon, heavily involved in Miami Beach design work; H. George Fink, who worked with George Merrick in the design for

¹³ Gail Meadows and William E. Hopper Jr., "Morningside and Bay Point," in *Miami's Historic Neighborhoods: A History of Community*, ed. Becky Roper Matkov (San Antonio: Historical Publications Network, 2001), 38. ¹⁴ Ibid.

Coral Gables; Kiehnel and Elliott, the Pittsburgh architectural firm which designed Miami's Scottish Rite Temple, Miami Beach's Carlyle Hotel, and Coral Gables' Congregational Church; V. H. Nellenbogen, responsible for the Savoy Plaza and the renovation of Miami Beach's Sterling Building; and Marion Manley, Florida's first female registered architect. The greatest expansion of the Bay Shore neighborhood occurred between 1936 and 1941. Deed restrictions reminiscent of those used Bay Shore's initial development insured architectural continuity in these new sections. 15

Quality materials and a unified character were also characteristic of the development. Nunnelly mandated concrete construction. Most houses used three-hole concrete block, a higher grade than the two-hole block variety typically used in modern construction. All had a stucco, stone, or ornamental cement exterior and tile roofs. Interior walls used Dade County pine with cypress lath covered with two coats of plaster. The average cost per house, \$7000, was "an insurance to every purchaser that he will be as proud of his neighbor's fine home as he is of his own," according to the advertisements for the neighborhood. 16

The Residents

As the decades passed, Miami's growth was to continue unabated through 1959 (the end of the district's period of significance.) City directories from the period provide information about the ethnic, professional, and marital background of Palm Grove residents during its period of significance. Surnames of 1931 residents demonstrate predominately Anglo ancestry with a healthy minority of residents with German names. George T. and Adeline V. Mann, Charles J. and Edith Joiner, Frederick J. and Esther Marshall, William F. and Betty Frantz, and Joseph and Helen Muller are examples. Residents held a variety of occupations. Tradesmen were well represented in 1931 Palm Grove. At 5946 NE 4th Court, carpenter Jesse J. Rogers lived with his wife, Anna. Auto mechanic William M. Mettair and wife Mary lived at 7801 NE 4th Court.

Executives, also, made their homes in Palm Grove. The president of Ideal Dry Cleaning, Ralph D. Hutchinson, and his wife June lived at 5900 NE 5th Avenue. At 553 NE 75th Street lived Winifred C. Ewing and her husband Orville W., president of Morrow, Becker, and Ewing, Incorporated. Some worked in real estate, the profession that so marked the preceding decade. Dorothy O. Scott lived at 598 NE 56th Street with her husband Paul R., the president of Biscayne Boulevard Company and New Miami Shores Corporation and treasurer of M. R. Harrison Construction Company. Service workers, such as Frederick J. Marshall, a clerk at A & P Tea Company, made their homes in Palm Grove. Asbury Griffith, an

¹⁵ Ibid, 18 – 25.

¹⁶ Ibid, 38-39

auditor who lived with his wife Margaret at 536 NE 77th Street, represented the professional class in Palm Grove. With some exceptions of single men or women, most residents were married and typically the husband in these partnerships supported the couple financially. Few women in the neighborhood were listed as having occupations.¹⁷

The 1941 City Directory indicates similar patterns for the following decade. Anglo names such as Dean Clark, at 445 NE 55th Street, Robert E. and Nan Cook at 469 NE 58th Street, and Theodore Potts at 450 NE 59th Street are in the majority. Professions continued to be mixed, but employment of one marriage partner, typically the husband, or of single residents was the norm. Occasionally both marriage partners listed a job. A barber lived at 560 NE 61st Street, the president of the Civic Bar Association at 577 NE 62nd Street, a salesman at 425 NE 63rd Street, and an engineer at 578 NE 64th Street. Hilda Scruggs, a teacher at Ojus Elementary School living at 537 NE 66th Street, represented the minority groups of single professionals and single women in the neighborhood. The presence of a few widows or widowers without listed employment suggests that retired people were also Palm Grove residents.¹⁸

By 1957 there was an increase among professional or executive residents. Palm Grove seems to have grown in wealth over the decades. Residents in this year can be categorized in similar categories to those observed in earlier directories as predominately Anglo or Saxon in ancestry, largely employed, and predominately married. An observable minority of single residents is still apparent. Marvin Maher was a single music teacher living at 5808 NE 4th Court. Maurice and Melba R. Goldman, living at 5920 NE 4th Court, did not list jobs and may have been retired. Lee V. Sexton was a dentist who lived with his wife Margaret at 5955 NE 4th Court. Further north at 580 NE 71st Street were Alvah G. and Mae W. Bondie; Alvah owned Marion's Fruit Shippers. Louise P. Freeze, resident at 493 NE 72nd Street, was an underwriter with Langston and Company. James H. Chance, an architect for Steward and Skinner, lived with his wife Vera at 444 NE 74th Street.¹⁹

Relationship to Criteria for Designation

The Palm Grove Neighborhood Historic District has significance in the historical and architectural heritage of the City of Miami; possesses integrity of design, setting, materials, workmanship, feeling and association; and is eligible for designation under the following criteria:

Criteria #3: Exemplify the historical, cultural, political, economical, or social trends of the community.

Criteria #4: Portray the environment in an era of history characterized by one or more distinctive architectural styles, or period, or method of construction.

Criteria #5: Embody those distinguishing characteristics of an architectural style, or period, or method of construction.

III. PREDOMINANT ARCHITECTURAL STYLES

The Palm Grove Neighborhood is replete with residences and multifamily dwellings that express the popular architectural "fashion" of the time. The following lists some of the most commonly found styles in the neighborhood.

<u>Spanish Colonial / Mediterranean Revival</u> <u>(Popular between approximately 1915 – 1940)</u>

In Florida, the similarities between its climate and that of the Mediterranean determined not only a theme for the architecture of these new Boom-time communities, but also provided a wealth of form and detail inspired by the countries surrounding the Mediterranean Sea, and particularly Italy, Northern Africa and Spain. The style lent itself not only to the larger, sprawling and elaborate homes of Palm Beach and Coral Gables, but to smaller homes as well.

5946 NE 4th Court

Typical Characteristics:

- multiple roof slopes (i.e. combinations of hips, gables, and flat)
- masonry construction and stucco exteriors
- asymmetrical plan
- barrel tile roofs
- round arches
- porte-cocheres
- balconies

- sleeping porches
- use of decorative cast ornament such as cast iron railings
- scrolled or stepped parapet

<u>Art Deco (Popular between 1920 – 1940)</u>

At a time when architecture was at a crossroads, when "modern" designers were rejecting the historicist styles of the past, Walter Gropius and Mies van der Rohe were experimenting with what became known as the "International Style." The style was pure geometry; relationships of form, and the renunciation of decorative elements.

Not surprisingly the Art Deco style developed at the same time and can be also considered modern, but one which employed ornament to their advantage. The emphasis in Art Deco design was in its streamlined, simple geometry, planar walls and the frequent use of flat roofs.

Typical Characteristics:

- Symmetrical or asymmetrical plan generally with a vertical emphasis.
- Central emphasis, often with a projecting parapet
- Ornamentation may be incised or in relief, ranging from organic forms, to geometric shapes, and often use motifs that reflect the local environment
- Glass Block and circular windows are common

572 NE 67th Street, 1936

Ranch House Style (Popular between approximately 1935 – 1970)²⁰

6820-22 NE 5th Avenue, 1952

Typical Characteristics:

- One story
- Low pitched gable roof
- Little overhang to roof eave, often with a boxed cornice
- Horizontal, rectangular, "L" of "U" shaped plan
- Longitudinal Placement on the Lot
- Long, low to the ground
- Windows: double hung, sliding, picture windows
- Attached garage, usually on the front
- Few interior walls
- Lack of decorative details
- Often decorative shutters at the windows
- Decorative iron or wooden porch supports

The ranch house owes a debt to the Prairie and Usonian houses created by Frank Lloyd Wright and to the Bungalow styles of the early 20th Century. Californian Cliff May (a licensed building designer, and formally an architect only in the last years of his life) is generally credited with building the first Ranch style house in San Diego California in 1932.²¹

²¹ Gallegos, Laura. Cliff May and the California Ranch House, Sacramento, California State University, 2005.

²⁰ Uguccioni, Ellen J and Antolin Carbonell, A Resurvey of the El Cid Historic District, West Palm Beach, Florida, Unpublished manuscript, City of West Palm Beach Planning Department, 2007

After World War II because of the need to house millions of returning servicemen, the ranch house attained a high level of popularity because they could be mass-produced, economically. Typically the homes featured "walls" of sliding glass doors leading to a patio that connected the resident to the outdoors. The popularity of the type grew exponentially leading *Architectural Digest* critic Alan Hess to remark:

The ranch house is the poor stepchild of American architecture. Unpretentious, low-slung, cranked out like Big Macs by tract-house builders in the 1950s, it was America's most widely built single-family home its very success casting a spell that doomed it to invisibility.²²

Witold Rybczynski, an architectural critic of some renown, also wrote about the Ranch House, adding a different perspective.²³ He explains that while today, we view the Ranch as the ultimate in conservative taste; that at its introduction, this house type represented a radical departure from previous taste. All the rooms were on one floor, the layout open and casual, wood paneling was used instead of wallpaper and room dividers replaced interior walls.

The exteriors reflect a decidedly contemporary impression; there were no steep roofs, dormers, or porches, except for a slight overhang to the roof on occasion that provided some protection from the weather. By 1950, the Ranch house accounted for **nine out of ten** new houses.

5900 NE 4th Court, 1937

Hess, Alan. "Romantic Mandalay: Recalling the Architect's Dream House in West Los Angeles." Architectural Digest, Special Edition (2005): 296-301.

²³ Rybczynski, Witold, "How America Fell in and Out of Love with the Ranch House," Slate Magazine, (http://slate.com/id/2163970/)

Author's Virginia and Lee McAlester are generally credited with coining the term "Minimal Traditional" in their widely popular book "A Field Guide to American Houses." The authors' developed nomenclature for previously unnamed housing types that are a product of the modern age.

Though not considered a "pure" or "high" style of architectural design, rather it is a sub-type under what the authors characterize as "Eclecticism" in the decades after 1940.

Typical Characteristics:

- One story
- Low roof slopes
- Prominent chimney
- Portions clad with brick or stone veneers
- Projecting bay (s) with a front facing gable
- Roof overhang creating a small porch

IV. Planning Context

<u>Setting</u>

The neighborhood is located on the west side of Biscayne Boulevard, and east of the FEC Railway. The defined area consists primarily of single-family homes, duplexes, four-plexes and some apartments. The Upper East Side of Miami is rich in history and design, and includes three of Miami's historic districts: the Miami Modern (MiMo)/ Biscayne Boulevard Historic District; Morningside Historic District; and the Bayside Historic District.

Preservation Incentives:

Historic district designation will further enhance the stability of the neighborhood. Design review of new construction that may be built in the neighborhoods will assist in maintaining aesthetic harmony. Further, for owners of single-family residences as well as income producing properties there is an ad valorem tax incentive for improvements in both Miami and Miami-Dade County.
